

# FOLIAR PLUS Xtra

15-3-3-3% (Ca)

For Foliar Application

**Contains Natural Occurring Enzyme  
Activators and Plant Hormones**

### GUARANTEED ANALYSIS

Total Nitrogen (N).....	15.000%
0.92% Nitrate Nitrogen.....	(N)
14.08% Urea Nitrogen.....	(N)
Phosphoric Acid (P <sub>2</sub> O <sub>5</sub> ).....	3.000%
Soluble Potash (K <sub>2</sub> O).....	3.000%
Calcium (Ca).....	3.000%
Boron (B).....	0.025%
Cobalt (Co).....	0.0005%
Copper (Cu) "Chelated".....	0.060%
Iron (Fe) "Chelated".....	0.150%
Manganese (Mn) "Chelated".....	0.094%
Molybdenum (Mo).....	0.0005%
Zinc (Zn) "Chelated".....	0.120%

Derived from: Urea, Phosphoric Acid Potassium Nitrate, Calcium Chloride, Sodium Borate, Cobalt Sulfate, Copper EDTA, Iron HEDTA, Manganese EDTA, Sodium Molybdate, Zinc EDTA.

## CAUTION!

**KEEP OUT OF THE REACH OF CHILDREN**

**Harmful if swallowed. Avoid contact with eyes,  
skin and clothing. Avoid breathing spray mist. Store above 32°F**

7000 N VALLEY DRIVE  
LAS CRUCES, NM 88007

**WESTERN BLEND  
FERTILIZER**

### GENERAL INFORMATION

FOLIAR PLUS XTRA 15-3-3-3% Calcium is a new generation product formulated to contain poly phosphates for more efficient utilization of the phosphorous by the plant. In addition, it contains certain natural occurring enzyme activators and plant hormones. It is a complete fertilizer containing extra calcium as well as micronutrients. It is recommended for use throughout the season in a program of multiple applications to enhance yield and quality.

### APPLICATION RATES

FOR OPTIMUM RATE AND TIMING CHECK WITH YOUR WESTERN BLEND REPRESENTATIVE:

#### FOLIAR APPLICATION:

**Mature Pecan Trees:** For best results use 1 gallon foliar combined with a 1/2 gallon western nitrate mix per acre at beginning of growing season. Combine with water at a 1.5% solution. For Example, 1000 gallon sprayer should contain 10 gallons foliar and 5 gallons western nitrate mix and should cover roughly 10 acres. Use water generously to soak the canopy of the orchard. Apply 4-5 applications for best results.

**Vegetables:** Use 1-4 quarts per acre depending on size of plant. First application should be made prior to flowering and/or fruiting. Continue throughout season at 7-10 day intervals.

### DIRECTIONS FOR USE

Apply with sufficient water for maximum coverage, usually 2-3 gallons per acre in conventional sprayers and 3-5 gallons per acre for aerial application. FOLIAR PLUS XTRA is compatible with most pesticides.

Follow the mixing sequence: 1) Water 2) FOLIAR PLUS XTRA 3) Pesticide

### What To Do In Case Of Contact:

**IF SWALLOWED:** Induce vomiting. Immediately call doctor.

**EYE CONTACT:** Flush eyes with clear water for 15 minutes; seek medical attention immediately.

**SKIN CONTACT:** Remove contaminated clothing and wash skin with soap and water. See doctor if irritation develops or persists.

**INHALATION:** Move to fresh air and call doctor if irritation develops or persists.

### READ LABEL: FOLLOW DIRECTIONS!

If there is contact made with the spray solution containing pesticides and/or spray adjuvants, follow the "Statement of Practical Treatment" on the product labeling.

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions or use. Since weather, crop, soil and other conditions may vary – Western Blend and/or the seller makes no warranty of any kind, expressed or implied, concerning, the use of this product. The user assumes all risks of use of handling whether or not in accordance with directions or suggestions.

# **WESTERN NITRATE** **MIX**

For correction or prevention of zinc deficiency in agricultural crops, vegetable crops, turf, trees and ornamentals.

## **GUARANTEED ANALYSIS**

<b>Total Nitrogen (N)</b> .....	<b>4.0%</b>
4.0% Nitrate Nitrogen	
<b>Manganese (Mn)</b> .....	<b>2.0%</b>
<b>Zinc (Zn)</b> .....	<b>8.0%</b>

Plant nutrients derived from manganese nitrate and zinc nitrate.

**NET WEIGHT: 11.9 bls/gallon (BULK)**

**CAUTION!**  
**KEEP OUT OF THE REACH OF CHILDREN**  
Harmful if swallowed. Avoid contact with eyes,  
skin and clothing. Avoid breathing spray mist. Store above 32°F

**Storage:** This product may be corrosive to aluminum, mild steel, and/or brass if not diluted. Use in fiberglass, polyethylene or stainless steel containers/tanks. Store in cool place out of direct sunlight. Location should be inaccessible to children, pets, domestic animals, and/or wildlife.

**Container Disposal:** Do not reuse empty containers. Triple rinse (or equivalent) then offer for recycling or disposal by procedures approved by state or local authorities.

## **GENERAL INFORMATION**

WESTERN NITRATE MIX is a proprietary blend of plant available soluble micronutrients, specifically formulated for use to treat zinc and manganese deficiencies and disorders in vegetable crops, field crops, trees, vines, turf and ornamentals. Used as a foliar spray along with a sound fertility program, this product assures that the nutritional demands of the plant are satisfied. Avoid application under extreme climatic conditions. WESTERN NITRATE MIX is an excellent acidification agent for alkaline water.

## **READ LABEL: FOLLOW DIRECTIONS!**

WESTERN NITRATE MIX is compatible with most pesticides, fungicides, and liquid fertilizer combinations, but NOT phosphate-containing fertilizers. Always conduct a jar test with new tank mixes to verify compatibility. If there is contact made with the spray solution containing pesticides and/or other spray adjuvants, follow the "Statement of Practical Treatment" on the product labeling. When mixing with other materials, add ingredients in this order: 1) ½ water, 2) WESTERN NITRATE MIX, 3) remainder of water, 4) other chemicals. Agitate thoroughly until mixed. A non-ionic surfactant should be added in all situations to the spray solution to aid in surface coverage and leaf absorption. WESTERN NITRATE MIX should be added to a minimum of 100 gallons of water/ac for diluted applications, and at least 20 gallons of water/ac for concentrate. For aerial application, a minimum of 5 gallons water/ac is required. For best results, apply when crops are actively growing and at multiple applications.

### FOR OPTIMUM RATE AND TIMING CHECK WITH YOUR WESTERN BLEND REPRESENTATIVE:

Stone Fruits, Nuts, Citrus.....	1-2 pt/ac in 100 gal water
Onions, Peppers, Tomatoes, Potatoes.....	1-2 pt/ac in 100 gal water
Row Crops.....	1-2 pt/ac in 100 gal water
Vegetable Crops.....	½ pt/ac in 100 gal water

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions or use. Since weather, crop, soil, and other conditions may vary, Western Blend and/or the seller makes no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use of handling whether or not in accordance with directions or suggestions.
